QuarkXPress™ 2027

What's New in QuarkXPress 2027

MORE FREEDOM TO DESIGN BIGGER

A fresh set of updates built to give your ideas more room to grow. Find features in a snap, take control of sprawling color libraries, build layered compositions directly inside shapes and keep structured lists in line – with updated OS support and stronger everyday stability.

COMPATIBILITY

Designed for the Latest macOS and Windows

- macOS® 27 Golden Gate
- Windows® 11

More in This Release

DESIGNED FOR macOS GOLDEN GATE

Feature	What's new in 2027
Color Groups	Keeping brand and spot colors organized and consistent across workflows has never been easier. Color Groups enables you to organize colors into named, searchable sets, so finding the right shade doesn't interrupt a good idea. Create a group, add new colors or drag existing ones into it, then move or duplicate swatches as your project evolves.
Text Scaling	Punch headlines without leaving your style sheets. Text Scaling lets you apply horizontal and vertical scaling to the same text, up to 1000%. Build condensed headlines and bold display type that stay fully editable, so you can restyle and reuse them as your layout evolves.
Feature Finder	You know what you want to do. Finding the right menu shouldn't be the hard part. Now, just open the new Help & Support palette and type what you need in your own words. Hey presto: QuarkXPress makes it easy to open the right feature in one click. No need to recall exact feature names or trawl every menu. Plus, the search runs on your machine, so no document content is shared.
Paste Into	QuarkXPress 2027 lets you anchor Paste Into shapes right in your text and turn a pasted PDF into editable objects. Get more control over your content, with fewer round trips to Photoshop or Illustrator. Build layered compositions without switching apps: place text, images or entire groups inside any shape, with nested containers, proportional scaling and masks you can keep editing.
Variable Fonts	Variable Fonts put your typography at your fingertips. A single font file opens up weight, width, slant and more, all adjustable with intuitive sliders. Fine-tune type to fit your layout instead of hunting for the right font family, and enhance your creative freedom.
Bullets & Numbering	Lists shouldn't need babysitting. QuarkXPress 2027 adds Circle and Dash bullet styles, giving you more ready-to-use options for structured and technical documents. The new styles mean less custom setup, fewer manual fixes and more time to bring the whole publication together.
Stability	Dozens of stability, performance and output improvements, including smoother touchpad scrolling on Windows, more reliable auto-backup settings, fewer launch crashes and security improvements. Spend less time troubleshooting and more in the creative flow state.

Quark

You've seen what's new.
Now see what you can do.

Put QuarkXPress 2027 to work on your next big idea. For more detailed information about the features and enhancements in the latest version of QuarkXPress, see the **release notes**.
