

# What's New in the QuarkXPress 2024 v20.1 Spring Update

## **Easily Search for Images Using AI Recognition in Local Image Libraries**

Search and find content with simple prompts using AI image recognition technology without leaving the QuarkXPress workspace. Boost your productivity when working on large and complex projects with a large volume of images across folders and network locations.

## **Save Time By Generating Hyperlinks Automatically**

In v20.1, hyperlinks such as email addresses and URLs from websites are automatically detected. Once added, the correct formatting is applied and the hyperlinks are underlined, saving you unnecessary format interruptions when creating design content.

## **Enrich IDML Exports with Tables, Static Pictures, Callouts and More**

Enhance the export between QuarkXPress and Adobe InDesign and add a smooth transition to maximize your creative collaboration. New IDML export features include tables, static pictures, callouts, multiple spread pages, bookmarks, gradients, column span, text shading, text kerning and text outlines.

## Check Image Quality Super-Fast with the Picture Links Palette

Validate your image quality with filters such as color space, status, and effective pixels per inch (PPI). Easily access the Picture Links Palette by right-clicking on an image, saving you time.

## Ready to Use Presets for GREP Find & Change

New pre-configured and customizable presets for GREP in v20.1 can be used without any prior knowledge, helping you streamline repetitive tasks. Share presets with your team by exporting and importing GREP presets.

## Step Up Your GREP Game with Character Styling

Carry out changes to specific typographic content such as character styling using GREP commands. Find & Change with GREP is not just for text content but can also work on character attributes for selection and replacement.

**For more detailed information about the features and enhancements in the latest version of QuarkXPress, please access the release notes here.**

If a quark – in science – is the basis for all matter, then Quark – the company – is the basis for all content. The company revolutionized desktop publishing and today provides content design, automation and intelligence software for end-to-end content lifecycle management. Customers worldwide rely on Quark to modernize their content ecosystems so they can create complex print and digital layouts, automate omnichannel publishing of mission-critical documents, and analyze production and engagement insights for the greatest return on their content investments.
