# Resolved issues: QuarkXPress 2020 (v16.3.6)

Following issue is resolved in QuarkXPress 2020 (v16.3.6).

- **RESOLVED:** QuarkXPress crashes on launching if Advantage Plan Maintenance End Date is within 60 days (221953, since v2020)

# Resolved issues: QuarkXPress 2020 (v16.3.4)

Following is a list of issues resolved in QuarkXPress 2020 (v16.3.4).

- **RESOLVED:** Error on validating Reflow ePub (Error while parsing file: element “tr” incomplete; expected element “td” or “th”) (186430, since v2019).
- **RESOLVED:** Unit conversion in “Item Find and Change” dialog box not working (198011, since v2017).
- **RESOLVED:** iBooks: Applied Bullet and Numbers formatting in Reflow ePub is not changed as per changed Gray or Night themes (198162, since v2018).
- **RESOLVED:** Thumbnail is not aligned to actual video in Preview in case if box size is less than 100px (204647, since v2019).
- **RESOLVED:** QuarkXPress Registration dialog pops up even if the user has already registered (206164, since v16.3).
- **RESOLVED:** Incorrect alert “QuarkXPress has been damaged” is showing on launching QuarkXPress after replacing copy pasted Nalp folder (206732, since v2020).
- **RESOLVED:** Unable to search Hindi words having a leading space at start of the word and the word ends with a syllable (207055, since v2018).
- **RESOLVED:** (*Windows only*) Border styles & names are displaying mismatched in the border tab of the measurement palette if screen resolution is more than 125% & above (207629, since v16.3).
- **RESOLVED:** QuarkXPress crashes on inserting header rows in non-breakable unanchored table (208686, since v2020).
- **RESOLVED:** Type styles are not reverted on importing XPress Tags file if they are followed by same tags (209275, since v2017).
- **RESOLVED:** Paragraph style sheet incorrectly appears overridden in specific documents; Local formatting tool tip appears blank. (210929, since v2019).
- **RESOLVED:** (*Windows only*) Unable to search all instances of each of the applied fonts using Show First/ Show Next options in Usage dialog (210950, since v2020).
- **RESOLVED:** (*Windows only*) Callout positioning is not automatically calced on modifying the Callout Style settings (211197, since v10x).

- **RESOLVED:** (*Windows only*) Style menu shortcuts are not working on UK English OS (212800, since v2020).
- **RESOLVED:** (*Mac Catalina 10.5.7 only*) QuarkXPress crashes on replacing existing files (211669).
- **RESOLVED:** (*Windows only*) Text and boxes are not visible after applying text angle in any box/ or if text boxes have vertical story, big black boxes are displayed on the layout (202309, since v16.2).
- **RESOLVED:** (*Windows only*) Project gets corrupted and all objects on layout gets disappear while selecting or moving the objects when project contains text skew applied text (208721, since v2020).
- **RESOLVED:** Unable to create PDF for specific documents (font specific) (209651, since v2019).

# Resolved issues: QuarkXPress 2020 (v16.3.3)

Following is a list of issues resolved in QuarkXPress 2020 (v16.3.3).

- **RESOLVED:** Greyscale compression gets applied to 1 Bit image when None color applied to it's Picture Background color, resulting in image outputted as blurry in Native path (4668, since v7x).
- **RESOLVED:** Taking lot of time to export as Reflow ePub for Projects with Anchors (196060, since v2019).
- **RESOLVED:** Applied Paragraph style sheet incorrectly appears overridden and displays Space Between as an overridden attribute on copy pasting text from a project created in version prior to 2019 to a project created in version 2019 and higher (199092, since v2019).
- **RESOLVED:** Unable to create PDF alert get displayed on outputting project having Avant Garde (199324, since v16.3.1).
- **RESOLVED:** (*Mac only*) Unable to Create PDF alert get displayed on outputting Folio and Bauhaus TT Font family (186296, since v16.2).
- **RESOLVED:** Incorrect font styling get applied on importing XPress Tags files having <f> and <f\$> tags and both font family and Font style gets reverted to current style sheet font family and font style if <f\$> tag is encountered (187121, since v2019).
- **RESOLVED:** Unable to created PDF alert getting displayed on outputting a project having Helvetica Neue font family type faces. (203802, since v2020).
- **RESOLVED:** Many other stability issues.

# Resolved issues: QuarkXPress 2020 (v16.3.2)

Following is a list of issues resolved in QuarkXPress 2020 (v16.3.2).

- **RESOLVED:** Blend mode applied copy pasted/static image was showing in output without blend mode (178816, since v2017).
- **RESOLVED:** (*Mac only*) Some fonts from Berkeley Font Family are outputting with incorrect font in Non-PS Printing. (179201, since v2017)
- **RESOLVED:** (*Windows only*) Could not create PDF with Book palette in some specific scenarios(182472, since v2018).
- **RESOLVED:** Drop shadow applied to picture boxes is rendering as blank in some specific scenarios (186178 since v2017).
- **RESOLVED:** Go to Page Hyperlinks are not working on Duplicating Page and Hyperlinks are duplicated in Palette (186198, since v2017).
- **RESOLVED:** QuarkXPress crashes if user copy/paste CZ in IDML converted QXP project. (186201, since v2017).
- **RESOLVED:** Tabbed text is not aligned properly in case of right tabs and left tabs with negative R Char justification settings applied on opening QuarkXPress project created in version higher than 2015 (186296, since v2016).
- **RESOLVED:** Entire text is not displayed in case if 'Include Footnotes option' is checked while importing specific customer word file (186650, since 2020).
- **RESOLVED:** Layout page doesn't get scrolled and current page is not in view if user tries to navigate through tracked changes using the Next arrow key (186981, since v10x).
- **RESOLVED:** No alert show when user was trying to Associate any tagged component as Callout Anchor (187118, since v2015).
- **RESOLVED:** (*Mac only*) Callout Association line is not appearing on Layout after associating any item as Callout anchor (187121, since v2020, 16.2).
- **RESOLVED:** Anchor Deleted from Hyperlink palette is not removed from Layout and it is still listed in New Hyperlink Dialog (188271, since v2015).
- **RESOLVED:** Following issues noticed while modifying tables in specific customer documents (188323, since v2019).
  - Extra row depth is introduced while Inserting Table break in table.
  - Unable to re-size table rows by dragging the row height manually.

## RESOLVED ISSUES: QUARKXPRESS 2020 (V16.3.2)

- Row height value entered manually in the measurement palette doesn't honor the value.
- **RESOLVED:** (*Mac only*) QuarkXPress crashes during file Save As on customer machine with different documents. (190052, since v2020).
- **RESOLVED:** IDML document does not open if IDML document contains Hebrew text (196066, since v2017).

# Resolved issues: QuarkXPress 2020 (v16.3.1)

Following is a list of issues resolved in QuarkXPress 2020 (v16.3.1).

- **RESOLVED:** Transparent areas of the images are outputting as corrupted for some PDFs (108298, since v2016).
- **RESOLVED:** (*Mac only*) Unable to create PDF alert get displayed on outputting a project having Helvetica Narrow font (133287, since v2019 15.0.1).
- **RESOLVED:** (*Windows only*) Very hard to make out the active layout tab In Gray and light Gray color theme/mode (141466, since v2016).
- **RESOLVED:** Incorrect font leading behavior with True Type fonts (148316, since v2017).
- **RESOLVED:** Some specific Jpeg images are importing and outputting as corrupted (160428, since v2017).
- **RESOLVED:** Font information for Tagged text is not interpreted correctly and incorrect font gets applied on the text (171190, since v2018).
- **RESOLVED:** Lines drawn at page edges gets truncated on outputting (170278, since v2018).
- **RESOLVED:** Fonts are not sorted alphabetically in the font menu of Read From Font in Edit Grid Styles dialog and font menu of Font Name in Text Character > Edit Rule dialog (185935, since v2020).
- **RESOLVED:** Imported PDF line/border thickness gets outputted wrongly on outing in Flatten Transparency path (173469, since v9x).
- **RESOLVED:** “..positioned off the pasteboard” alert is showing on Duplicating Project with Anchored Table with Combined Cells (177814, since v2018).
- **RESOLVED:** Footnote does not appear on correct page in some scenarios (178450, since v2017).
- **RESOLVED:** Text before underscore in style sheet name is replaced with layout name on duplicating layout with Adaptive Scaling and Duplicate Style sheets options (179198, since v2015).
- **RESOLVED:** InDesign Batch Converter UI size is not adjusted as per screen resolution (179140, since v2019).
- **RESOLVED:** Fill color gets overlapped by white color in output for box having fill color and multiple borders (179859, since v2019 15.2).

## RESOLVED ISSUES: QUARKXPRESS 2020 (V16.3.1)

- **RESOLVED:** Images placed on unused Master pages also collected in HTML5 Output(181136, since v2015).
- **RESOLVED:** Image imported in External CZ is not updating on layout and shown as checker box (174839, since 2020 16.1).
- **RESOLVED:** Crash while updating the missing chapters for some specific Books(182849, since v2020).
- **RESOLVED:** Crash on launch in case if user does not have write permissions of the “QuarkXPress 2020” / QLog.cfg file(182391, since v2017).
- **RESOLVED:** Images placed in scroll zone layouts are not showing on layout without switching focus to scroll zone layout(119535,since V 2019 15.1).
- **RESOLVED:** (*macOS Big Sur only*) File name extension appends twice at the end of file name on doing specific actions like Save as, Save A Copy As, Export as PDF, Export as EPS etc (162763, since v2020).
- **RESOLVED:** Text calcng issue on pressing Forward delete key or backspace key in some projects if there is a runaround item (185337, since V 2018).
- **RESOLVED:** Word ‘Mississippi’ is not flagged as suspect word in US English text language (184813, since v9).
- **RESOLVED:** (*macOS Big Sur only*) Unable to edit the text field in conditional style if a previous or subsequent rule doesn’t have a text field on Edit Conditional Styles (175385, since v2020).

# Resolved issues: QuarkXPress 2020 (v16.3)

Following is a list of issues resolved in QuarkXPress 2020 (v16.3). Note that the following is not an exhaustive list of all fixes in this version.

- **RESOLVED:** To provide support to save proxy settings, so that QuarkXPress product activation can work in a proxy environment where Nalpeiron fails to detect the proxy environment. (180178, since v2020 16.1)
- **RESOLVED:** QuarkXPress does not launch if the username contains accented or diacritical characters. (183336, since v2020 16.2)
- **RESOLVED:** Row height for all rows in a table get changed if table break is applied and continued header property is defined as First Header Row. (180029, since v2019)
- **RESOLVED:** (Windows only): Zero opacity for None color background does not work if Opaque Text box Editing is turned on. (172187, since v2019)
- **RESOLVED:** Unused colors get added in the color palette while importing a RTF file. (157870, since v10)
- **RESOLVED:** A solid soft mask is applied to all the images in an exported PDF, if the PDF image cropped by a picture box or by the page, which results in pre-flight errors in Acrobat. (166054, v2017)
- **RESOLVED:** On outputting a 1-Bit image with None color as PDF, it gets converted to 8-Bit. (167933, since v2015)
- **RESOLVED:** Vertical shadow gets pasted as horizontal on copy and pasting a vertical line having drop shadow. (169701, since v8)
- **RESOLVED:** Static images that have been copy-pasted from MS Word application gets scaled and flipped in flattened output. (102882, since v2018)
- **RESOLVED:** CMYK colors in the vector EPS/PDF or CMYK raster images are not color managed in Grayscale 100K output setup in native output. (147558, since v2015)
- **RESOLVED:** Text Shading having opacity applied to the text in a text box does not output in flattening mode. (4974, since v2017)
- **RESOLVED:** 1-Bit images colorized with custom color, None color applied to picture background in QuarkXPress created PDF files is rendered as a solid color patch when Grayscale images are down sampled under compression during output. (105069, since v2018)

## RESOLVED ISSUES: QUARKXPRESS 2020 (V16.3)

- **RESOLVED:** Incorrect Print preview is displayed for facing page projects having default spread size. (114773, since v10)
- **RESOLVED:** Font style is not honored while importing XPress Tags files created in version 2017 or earlier. (181406, v2018)
- **RESOLVED:** Text Shading Style having border should display bottom and top border lines for continuous paragraphs have same text shading style when text flows across columns. (160743, v2017)
- **RESOLVED:** (*Windows only*): Unable to insert special characters and symbols by holding down AltGr key in European language IMEs/ keyboards. (158903, since v2020 16.0)
- **RESOLVED:** Words with apostrophe are not flagged as suspect words if they are added in the auxiliary dictionary or are already in the spell check dictionary. (160192, since v9)
- **RESOLVED:** (*Mac only*): Mouse cursor does not change to Pan tool even when the cursor is outside the Find/ Change palette while holding down the Option key if the focus is within the text field of the palette. (143092, since v10)
- **RESOLVED:** Text reflows if a split column paragraph starts with a column break character, then on performing operations like moving the text box/ resizing the text box/ saving and reopening project, space is created between the split column paragraph and the previous paragraph. (180562, since v2017)
- **RESOLVED:** (*Windows only*): Tile Vertically stops working after maximizing one project and selecting the second project from Windows menu. (173411, since v2019)
- **RESOLVED:** Center aligned text in the Design Blocks are displayed as left aligned in HTML Output. (170258, since v2020 16.1)
- **RESOLVED:** Cursor moves incorrectly in the reverse direction while typing in flipped text boxes in digital layouts. (171949, since v2017)
- **RESOLVED:** Go to Page interactivity does not work correctly in a Fixed ePub if the interactivity is applied in any referenced layout. (163012, since v2018)
- **RESOLVED:** Facing Pages option is disabled while duplicating a Print to Print layout, a Digital to Print layout and enabled while duplicating a Digital to Digital layout, a Print to Digital layout. (6116, since v2017)
- **RESOLVED:** White lines appear around the image in a Reflow ePub while viewing it in iBooks application with Dark Appearance. (176403, since v2018)
- **RESOLVED:** Layout items in a composition zone appear truncated on generating PDF output with native transparency settings. (184656, since v2020)

# Resolved issues: QuarkXPress 2020 (v16.2)

Following is a list of issues resolved in QuarkXPress 2020 (v16.2).

- **RESOLVED:** Unable to drag items into the QuarkXPress library from the other drive or Desktop. (148604, v2019)
- **RESOLVED:** On performing Check for Updates, Quark Update 2020 v16.1 is visible even for legacy QuarkXPress versions. (160968, v2020 16.1)
- **RESOLVED:** (Windows): Bleed symmetric icon [lock / unlock] is NOT visible in light theme. (161286, v2020 16.1)
- **RESOLVED:** Snapping continues to work with bleed guides, even if user disables Snap to guides option. (162048, v2020 16.1)
- **RESOLVED:** Item snapping with bleed guides does not work on master pages, even if user enables Snap to Guides option. (162052, v2020 16.1)
- **RESOLVED:** Item snapping with bleed guides does not work if the user disables Show Dynamic Guides option. (162109, v2020 16.1)
- **RESOLVED:** QuarkXPress crashes on inserting a table row above first row having header rows with combined cells in it. (162279, v2018)
- **RESOLVED:** (Windows only): QuarkXPress crashes while opening specific IDML documents. (160844, v2018)
- **RESOLVED:** Anchored/ Inline tables and Bezier images causes text to overflow and QuarkXPress crashes while importing specific IDML files. (31307, v2018)
- **RESOLVED:** Data loss occurs while importing a specific IDML file. (47831, v2017)
- **RESOLVED:** (Mac only): Library does not reopen automatically after quitting and relaunching of QuarkXPress application. (145715, v10)
- **RESOLVED:** 'QuarkXPress is damaged' alert is displayed while launching QuarkXPress application in any other users other than the user in which the application is installed. (166622, v2020 16.1)
- **RESOLVED:** (Mac only): QuarkCEFRenderer crashes multiple times while launching QuarkXPress application. (171557, v2020)
- **RESOLVED:** QuarkXPress crashes while opening specific document. (164953, v2020)

## RESOLVED ISSUES: QUARKXPRESS 2020 (V16.2)

- **RESOLVED:** (Windows only): Performance delay occurs while working with Type1 Postscript fonts. (164896, v2018)
- **RESOLVED:** Unable to generate PDF output PDF with specific project having PDF file having embedded TrueType Fonts. (157502, v2019 15.2)
- **RESOLVED:** Unable to generate PDF output PDF with specific project having PDF file having embedded TrueType Fonts. (157504, v2019 15.2)
- **RESOLVED:** Unable to generate PDF output PDF with specific project having PDF file having embedded TrueType Fonts. (151052, v2019 15.2)
- **RESOLVED:** Specific PDF having 'Isolated knockout Transparency Group' objects is rendered as blank on importing in QuarkXPress. (162887, v2020 16.1)
- **RESOLVED:** Performance delay occurs during layout operations if the project contains tab fill characters. (163261, v2019)
- **RESOLVED:** Text gets displaced in specific PDF files having embedded Type1 fonts are incorrectly rendered and outputted PDF files having embedded Type1 fonts. (161007, v2016)
- **RESOLVED:** Inside Bleed is not set correctly when creating a facing-page layout. (161128, v2020 16.1)
- **RESOLVED:** Color Bar is not outputting even after enabling while outputting PDF from a Book. (161201, v2020 16.1)
- **RESOLVED:** Text applied opacity outputs with incorrect color value in flattened output when text box color has opacity or shade. (101107, v2017)
- **RESOLVED:** QuarkXPress crashes on importing the specific PDF file. (129430, v2017)
- **RESOLVED:** Opacity applied to 'Rule Below' lines and text box color is outputting incorrectly in flattened output. (154098, v2017)
- **RESOLVED:** Square parenthesis in specific Math formulas are not rendering properly on imported properly from EPS files. (157178, v2018)
- **RESOLVED:** (Windows only): Path /stroke created with "0 x 0" width and height values and saved as EPS / PDF files in Adobe Illustrator are rendered and exported as blank in QuarkXPress. (31441, v2015)
- **RESOLVED:** Imported PDF/AI images render in low-resolution, and even after zoom-in and zoom out the imported images continue to render in low resolution for a long time. (162049, v2020 16.1)
- **RESOLVED:** (Mac only): Unable to determine file path using AppleScript, if files are on AFP Network volume. (168869, v2019)
- **RESOLVED:** Unwanted space is displayed in table rows in a specific project. (164976, v2020)
- **RESOLVED:** Runaround does not work correctly on saving and reopening a project if the text box height is set to auto. (151482, v2019 15.1)
- **RESOLVED:** (Windows only): dmessage file gets created while running spell check; and also, while opening specific projects. (149893, v9)

- **RESOLVED:** QuarkXPress hangs on running spell checking specific projects. (132870, v2018)
- **RESOLVED:** Incorrect words are displayed in the proposal list for German compound words during spell check. (164407, v2019)
- **RESOLVED:** (Mac only): Uppercase accented E character with circumflex ‘Ê does not render on the layout when used in Running Header content variable. (155275, v2019)
- **RESOLVED:** (Mac only): Font style appears blank for specific fonts in case of specific user names. (118260, v2018)
- **RESOLVED:** (Windows only): QuarkXPress application hangs while opening specific customer projects. (165801, v2017)
- **RESOLVED:** (Windows only): Text calcing issue on copy-pasting text from a project having document fonts to another project if local character formatting is applied and text contains Bold Italic font style. (164939, v2020 16.0)
- **RESOLVED:** Applied style sheet appears overridden, but the local formatting tool tip displays as blank for the most text in a specific project. (165973, v2020 16.0)
- **RESOLVED:** (Windows only): Favorite glyphs get multiplied on activating/deactivating fonts in the Glyph palette. (163629, v2019)
- **RESOLVED:** (Windows only): QuarkXPress crashes while working with favorite glyphs in the glyph palette. (1693029, v2018)
- **RESOLVED:** Anchored Table in a specific project gets distorted in Reflow ePub. (159966, v2019)
- **RESOLVED:** Auto-play applied video files do not play even if user clicks on Play icon in case Video interactivity is applied on a None Box. (146935, v2018)
- **RESOLVED:** TTC font gets replaced with default font in HTML5 Preview on Firefox and IE browsers. (5604, v2015)
- **RESOLVED:** Specific color Profile (eciRGB V2 ICCv4) applied images render differently in Fixed Output. (121265, v2019 15.2)
- **RESOLVED:** (Windows Only): QuarkXPress crashes on exporting specific project as Reflow ePub. (159924, v2019)
- **RESOLVED:** Space inserted between two words having different attributes applied appears as a double space in HTML 5 Output. (128673, v2020)
- **RESOLVED:** Video Previews do not render on Mobile Devices for HTML5 and HTML5 Publications in Flex Layout. (142318, v2018)
- **RESOLVED:** Bouncing effect should not be there after playing an animation. (152202, v2018)
- **RESOLVED:** An error occurs while validating fixed ePub without including TOC: element “ol” incomplete; missing required element “li”. (119501, v2018)
- **RESOLVED:** Colors are rendered differently for exported images with specific Profiles (eciRGB V2 ICCv4 Profile) in source color setup. (121337, v2019 15.1)

# Resolved issues: QuarkXPress 2020 (v16.1)

Following is a list of issues resolved in QuarkXPress 2020 (v16.1).

- **RESOLVED:** To provide an option to convert all footnotes to endnotes and vice versa in QuarkXPress. (6527, v2015)
- **RESOLVED:** To provide an option to count the number of words and characters in a text selection in QuarkXPress. (6596, v8)
- **RESOLVED:** To provide support for Page Name and Page Title in Flex layouts in QuarkXPress. (19214, v2020)
- **RESOLVED:** To integrate with export options to provide accessibility support for HTML5 Output. (39711, v2020 16.0)
- **RESOLVED:** To provide numbering style formats for Greek and Russian languages in numbering style in QuarkXPress. (48947, v2019)
- **RESOLVED:** (*Windows only*): QuarkXPress preferences get corrupted on quitting and relaunching the application if the username contains a special/ accented character. (56392, v2017)
- **RESOLVED:** Warnings are displayed on validating Reflow ePubs created using QuarkXPress if ePubCheck version is less than 4.2. (61783, v2019)
- **RESOLVED:** To provide an option to hide Tab ruler in QuarkXPress. (86897, v2019)
- **RESOLVED:** To allow rollover on mouse hover in QuarkXPress. (90014, v2020 16.0)
- **RESOLVED:** To provide an application-level preference for defining paste behavior while pasting content from external applications. (104000, v2019 15.1)
- **RESOLVED:** Some glyphs are output as junk if the layout contains specific PDF files having referenced fonts. (107372, v2018)
- **RESOLVED:** To provide the following OpenType features: Historical Ligatures, Alternative Fractions, Petite capitals in QuarkXPress (109895, v2019)
- **RESOLVED:** Project containing MS Word created PDF file having referenced umlaut characters does not output correctly with native transparency settings. (110772, v2018)
- **RESOLVED:** The text cursor should be displayed a little thicker. (116562, v2019)

- **RESOLVED:** The last character of the inserted text gets omitted in the Redline tooltip for a text deletion if the text deletion contains a text deletion and text insertion. (117207, v2018)
- **RESOLVED:** Cyan color background is output as blank if the layout contains specific InDesign created transparent PDF files. (121659, v2017)
- **RESOLVED:** (*Windows only*): Many of the Creative Cloud fonts are displayed very thick in QuarkXPress. (121760, v2019)
- **RESOLVED:** Specific PDF files having embedded TTF CID font are not imported and outputted correctly. (125650, v2015)
- **RESOLVED:** Full Screen Only videos are not honored during Loop. (135197, v2018)
- **RESOLVED:** The user should be able to resize Edit List dialog. (136718, v2020 16.0)
- **RESOLVED:** The minimum distance between bullet/ number and text is ignored if the alignment in the bullet/ numbering style is set as right. (137459, v9)
- **RESOLVED:** YouTube label is shown while playing the video even if the user sets modestbranding=1 parameter. (137579, v2018)
- **RESOLVED:** Collect for Output should be able to collect the fonts used in the unused master pages, and the fonts applied in the unused style sheets. (137774, v2020 16.0)
- **RESOLVED:** Interactivity is not displayed if the user embeds a HTML5 Publication into a website with an iframe. (138303, v2019)
- **RESOLVED:** QuarkXPress crashes on generating PDF if the layout contains specific PDF files having math equations of Type1 (CID) font type. (139829, v2018)
- **RESOLVED:** (*Safari browser only*): HTML5 Publication page exported from a Flex layout freezes while scrolling on an iPhone. (140137, v2019)
- **RESOLVED:** Automatic page number characters are not displayed in Digital output if the box containing that character is placed on top of a linked text box. (140248, v2019)
- **RESOLVED:** Some glyphs are not rendered on importing specific PDF files having the embedded Type 1 CID font. (140462, v10)
- **RESOLVED:** The numbering does not restart for lower levels after the defined style sheet if Restart Numbering After is set as that style sheet. (141155, v2020 16.0)
- **RESOLVED:** (*Mac only*): Rule Below is lost while importing IDML files in QuarkXPress. (142226, v2018)
- **RESOLVED:** (*Mac only*): QuarkXPress crashes while removing the last formatting rule and clicking on a table grid line. (142386, v2019)
- **RESOLVED:** Drop shadow applied to Clipping applied images or transparent images having shapes does not retain its original shadow shape on copy-pasting. (143429, v2019 15.2)

## RESOLVED ISSUES: QUARKXPRESS 2020 (V16.1)

- **RESOLVED:** (*Mac only*): Show Thumbnail Window incorrectly gets invoked on pressing any dead key on the keyboard if no shortcut is assigned for it. (143532, v2019)
- **RESOLVED:** PDF does not get created from a book if the project/PDF name contains accented characters. (145447, v2020)
- **RESOLVED:** PDF is incorrectly generated with Flattened Transparency instead of Native Transparency while outputting specific book files using Default PDF Output Style. (147079, v2019)
- **RESOLVED:** QuarkXPress crashes while opening specific projects. (147424, v2019)
- **RESOLVED:** To provide custom HTML interactivity support for Digital Fixed Layouts. (149417, v2020)
- **RESOLVED:** To provide animated GIF support in Digital Layouts. (149420, v2020)
- **RESOLVED:** (*Mac only*): QuarkXPress crashes while initializing palettes on application launch on specific machines. (149439, v2020 16.0)
- **RESOLVED:** Text runaround does not work correctly if one or more columns of the multi-column text box are completely overlapped by a runaround item. (149854, v2020 16.0)
- **RESOLVED:** Shade applied to box color renders as a darker shade after drawing a line with specific projects. (149866, v2018)
- **RESOLVED:** On opening a Reflow ePub on Kindle Previewer, all lines in a paragraph are displayed on a single page, due to which blank spaces are displayed on the pages. (150506, v2019)
- **RESOLVED:** (*Mac App Store only*): While outputting text in TTC fonts and dfonts, glyphs do not download in the PostScript, due to which they render in Courier font. (151898, since v2020 16.0.1)
- **RESOLVED:** (*Windows only*): Keyboard equivalents in the style sheets are lost on opening specific Mac created projects on Windows; the user is unable to type some numbers thereafter. (155500, v2016)
- **RESOLVED:** Fonts that are partially present in system fonts become missing after resolving the remaining missing fonts of the same family from the user-specified fonts folder. (140307, v2020 16.0)
- **RESOLVED:** (*Mac only*): Screen fonts are not collected for Type1 fonts while performing Collect for Output. (142249, v2020 16.0)
- **RESOLVED:** Validation occurs only for the first master when enlarging a layout having variable pages. (136267, v2020 16.0)
- **RESOLVED:** (*Windows Only*): Interactive Objects list is not updated on adding design block with some interactivity. (139084, v2020 16.0)
- **RESOLVED:** The user can drag and drop the page to the left or right side of the spine on a new spread even it exceeds the maximum spread width when the project is in thumbnail view mode. (139650, v2020 16.0)

## RESOLVED ISSUES: QUARKXPRESS 2020 (V16.1)

- **RESOLVED:** The user can move the page using thumbnail drag and drop even if the spread width exceeds the maximum spread width. (140041, v2020 16.0)
- **RESOLVED:** On moving or deleting the pages in a project having wider pages, the spread box space is not calculated properly. (140096, v2020 16.0)
- **RESOLVED:** The user is unable to move Page #3 to the right side of the spine in a Thumbnail View when Pages #2 and #3 are on the left side of the spine. (140490, v2020 16.0)
- **RESOLVED:** Items on a variable page are displayed on the pasteboard on reducing the page size through Layout Properties dialog. (141153, v2020 16.0)

# Resolved issues: QuarkXPress 2020 (v16.0)

Following is a list of issues resolved in QuarkXPress 2020 (v16.0). Note that the following is not an exhaustive list of all fixes in this version.

- **RESOLVED:** List items in Shared Content Palette should be sorted in alphabetical order. (4730, since v2015)
- **RESOLVED:** Unable to play YouTube/Vimeo Videos in the Fixed ePubs. (5462, since v2015)
- **RESOLVED:** (*Windows only*): Minimized projects get hidden behind the measurement palette. (6316, since v2015)
- **RESOLVED:** (*Windows only*): The name and icon of the project are not displayed properly in the title bar of a minimized project. (27951, since v2016)
- **RESOLVED:** (*Mac only*): An error pops up on running the Apple script while getting Character Styles and it is unable to read out Style with Text. (34914, since v2016)
- **RESOLVED:** Should be able to specify the indent level for selected Outline numbering style in the paragraph style sheet and be able to restart numbering after a defined level or style. (52166, since v9)
- **RESOLVED:** Source paragraph style formatting is lost and it reverts to Normal style, on the copy-pasting text in table cell if AutoFit Row is checked, or on resizing linked cells, adding or removing rows, etc. (86679, since v2019)
- **RESOLVED:** Frame and grid corners are not drawn correctly on applying a different border to the merged cells in a row. (87955, since v 2019)
- **RESOLVED:** A small line is visible in a QuarkXPress outputted PDF having heterogeneous borders while viewing in the PDF Element app. (100554, since v2019)
- **RESOLVED:** The dotted frame applied to the Bezier curve is not drawn properly. (101915, since v9)
- **RESOLVED:** (*Windows only*): Shortcut for Indent Here does not work in the Italian language. (104607, since v2018)
- **RESOLVED:** PDF export fails if the installed font folder count exceeds 1400. (109554, since v2018)
- **RESOLVED:** PostScript Error is displayed for specific PDFs during PDF output with native transparency setting. (117162, since v2019 - 15.0.1)

- **RESOLVED:** Spaces are not displayed words in Reflow ePub if a different attribute is applied to the space character. (118003, since v2017)
- **RESOLVED:** Unable to convert mouse pointer into a hand shape navigation tool if 'Open file' or 'Show Pop Up action is defined for Button interactivity. (120627, since v2017)
- **RESOLVED:** Hyperlink gets applied to the entire page on outputting projects having the hyperlinks with underscore or hyphen characters. (126664, since v2018)
- **RESOLVED:** The word next to the hyperlink placed in a Flex Layout jumps to a new line on exporting as an HTML5 Publication. (127969, since v2019)
- **RESOLVED:** Allow minimum font size to be 1 pt. in QuarkXPress. (128628, since v4)
- **RESOLVED:** (*Mac only*): QuarkXPress crashes during text hyphenation after copying pasting long text string in Italian text language. (134212, since v2018)
- **RESOLVED:** Height of Table row becomes smaller after the deletion of composite tables. (137905, since v2019)
- **RESOLVED:** QuarkXPress application hangs on restarting numbering from 0 if applied numbering style has any of the two numbering formats: \*,†,‡,§ and \*, \*\*, \*\*\*, \*\*\*\*. (139569, since v2016)
- **RESOLVED:** (*Windows only*): .PFM fonts are not collected for Type1 fonts while performing Collect for Output. (120537, since v2018)

# Known issues as of QuarkXPress 2020

Following is a list of known issues in QuarkXPress 2020.

- Performance issues with Flex page Builder Palette first time after launching the application. (135599)
- QuarkXPress application crashes on the re-applying master page in a Flex Layout. (136064)
- Tables having Grids with 0% opacity are outputted incorrectly. (140460)
- The same shortcut keys are assigned to two commands due to which one of them does not work. (133671)
- The progress bar is not displayed on duplicating pages in a heavy document. (126779)
- Custom page dimensions are reset to default on removing their respective master page. (130276)
- Page/content shift to the left side in a Non-PS output while printing variable pages with page flip and fit in print area settings. (138271)
- Page insertion/duplication does not work when the spread width is wider or the number of pages is more. (141036)
- Pages get overlapped and the gap gets created on inserting the pages in non-rippling cases. (141081)
- Be able to load Fonts from the application font folder using an alias/symbolic link to a font folder placed at a different location. (128477)
- Be able to handle the activation/ deactivation of document fonts and application fonts when the document is in open and while the application is in session. (128485)
- On exporting a PDF with referenced fonts, document fonts are replaced with courier font which is embedded in the PDF. (139319)
- (*Mac OS Big Sur*): White lines appear over the objects on applying Composite CMYK soft proof when Blending Mode applied objects are present on layout. (175419, v2020 16.2)
- (*Mac OS Big Sur*): Palettes get hidden if the user switches focus to any other application while launching QuarkXPress application. (176952, v2020 16.2)

- *(Mac only)*: During layout panning whenever a new area with high-resolution images is rendered, there is a delay compared to text and other objects panning. (171334, v2020 16.2)
- *(Mac only)*: There are redraw issues while zooming the layout having clipping applied images. (170448)
